

# Glutaprol

## Collagen booster

Glutaprol is an **esterified form of  $\alpha$ -ketoglutarate**, which is a natural cofactor in the hydroxylation of proline in the skin cells. Proline is a key component of collagen fibers and its sufficient hydroxylation is essential for the successful completion of synthesis and the subsequent correct conformational arrangement of the entire collagen fiber.

- ✳ Strong collagen booster
- ✳ Wrinkle reduction
- ✳ Elasticity improvement

  
**COLLAGEN INCREASE**  
**96%**
